Disclosure Regarding Non-GAAP Financial Measures and Key Metrics

In addition to the financial measures presented in this release in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"), the Company has included certain non-GAAP financial measures in this release, including Adjusted EBITDA, Adjusted Net income, Adjusted Diluted EPS and Adjusted EBITDA margin. These non-GAAP financial measures provide users of our financial information with useful information in evaluating our operating performance and exclude certain items from net income that may vary substantially in frequency and magnitude from period to period.

We define EBITDA as net income before interest, taxes, depreciation and amortization. We define Adjusted EBITDA as net income before interest, income taxes, depreciation, amortization of cloud-based software implementation costs, adjusted for the impact of certain additional non-cash and other items that we do not consider in our evaluation of ongoing performance of our core operations. These items include showroom pre-opening expense, equity-based compensation expense, costs to fund the Brilliant Earth Foundation and transaction costs and other expenses that we did not incur in the normal course of business. We define Adjusted EBITDA margin as Adjusted EBITDA calculated as a percentage of net sales. We believe that Adjusted EBITDA and Adjusted EBITDA margin, which eliminate the impact of certain expenses that we do not believe reflect our underlying business performance, provide useful information to investors to assess the performance of our business.

We define Adjusted Net income as net income adjusted for the impact of certain additional non-cash and other items that we do not consider in our evaluation of ongoing performance of our core operations. These items include showroom pre-opening expense, equity-based compensation expense, costs to fund the Brilliant Earth Foundation and transaction costs and other expenses that we did not incur in the normal course of business. We define Adjusted Diluted EPS as Adjusted Net income, divided by the diluted weighted average shares of common stock outstanding. The diluted weighted average shares of common stock outstanding is derived from the historical diluted weighted average shares of common stock assuming such shares were outstanding for the entirety of the period presented. We believe Adjusted Net income and Adjusted diluted Earnings Per Share, which eliminate the impact of certain expenses that we do not believe reflect our underlying business performance, provide useful information to investors to assess the performance of our business.

Please refer to “GAAP to Non-GAAP Reconciliations” located in the financial supplement in this release for a reconciliation of GAAP to non-GAAP financial information.

This release includes forward-looking guidance for certain non-GAAP financial measures, including Adjusted EBITDA. These measures will differ from net income (loss), determined in accordance with GAAP, in ways similar to those described in the reconciliations at the end of this release. We are not able to provide, without unreasonable effort, guidance for net income (loss), determined in accordance with GAAP, or a reconciliation of guidance for Adjusted EBITDA to the most directly comparable GAAP measure because the Company is not able to predict with reasonable certainty the amount or nature of all items that will be included in net income.

This press release also contains certain key business metrics which are used to evaluate our business and growth trends, establish budgets, measure the effectiveness of our sales and marketing efforts, and assess operational efficiencies. We define total orders as the total number of customer orders delivered less total orders returned in a given period (excluding those repair, resize, and other orders which have no revenue). We view total orders as a key indicator of the velocity of our business and an indication of the desirability of our products to our customers. Total orders, together with AOV, is an indicator of the net sales we expect to recognize in a given period. Total orders may fluctuate based on the number of visitors to our website and showrooms, and our ability to convert these visitors to customers. We believe that total orders is a measure that is useful to investors and management in understanding our ongoing operations and in an analysis of ongoing operating trends. We define average order value, or AOV, as net sales in a given period divided by total orders in that period. We believe that AOV is a measure that is useful to investors and management in understanding our ongoing operations and in an analysis of ongoing operating trends. AOV varies depending on the product type and number of items per order. AOV may also fluctuate as we expand into and increase our presence in additional product categories and price points, and open additional showrooms.
